## Warhammer 40,000: Leviathan English box set

This humongous box contains 72 new miniatures split between the Space Marines and the Tyranids. The Emperor's Angels of Death are represented by an indomitable Captain in Terminator Armour, a Librarian in Terminator Armour, a Primaris Lieutenant in Phobos Armour, an Apothecary Biologis, five immense Terminators, five Sternguard, a sharpshooting Ballistus Dreadnought, and 10 pyreblaster-toting Infernus Marines.

They are holding the line against the worst that Hive Fleet Leviathan can throw against them, including a savage Winged Tyranid Prime, a brain-melting Neurotyrant and its two Neuroloid lackeys, three Von Ryan's Leapers, a Psychophage, a swarm of 20 Termagants and two Ripper Swarms, 11 Neurogaunts, five Barbgaunts, and a brutal reimagining of the iconic Screamer-Killer.

Besides all these fantastic miniatures, there is a massive special edition hardback Leviathan Core Book, containing all of the contents of the Warhammer 40,000 Core Book (which will be released very shortly after). This weighty grimoire includes the first narrative Crusade Expansion, extensive background lore, and galleries of miniatures for every major faction. We're not done, because there's also a 66-card Chapter Approved Mission Card Deck which generates tense and exciting Matched Play missions, and a Space Marines transfer sheet.
